01

The Company

Founded in Doha in 2011. An integrated engineering and manufacturing business for smart architectural systems.

**“We started with shade. We built a factory,
an engineering team and a standard
— and we have never once asked a
client to accept less than we would
accept ourselves.”**

Amr Jassir Salem

Chief Executive Officer, Al Zhbya International

Who we are

Al Zhbya International is a Qatari smart architectural solutions organisation, engaged in production and installation since 2011. We design, engineer, manufacture, supply, install, test and maintain — under one commercial responsibility, from our own factory.

- Established 2011 · Doha, State of Qatar
- Own manufacturing plant with five production units
- Government, semi-government, developer and private clients
- ISO 9001:2015 and ISO 45001:2018 certified

At a glance

01 Legal identity

Al Zhbya International, trading since 2011. C.R. 115135, commercial licence 150507, registered capital QAR 4,000,000.

02 Scope of works

Parking shades, pergolas, steel structures, glass systems, construction and general contracting — the certified ISO scope.

03 Delivery model

Design, engineering, manufacturing, supply, installation, testing, maintenance and after-sales under one contract.

04 Markets

Qatar as the home market, with delivery and representation across the UAE, Saudi Arabia and Egypt.

Vision and mission

Our vision

To be the trusted engineering partner for smart shading and architectural systems in the region, by delivering high-quality products and innovative designs that meet the evolving demands of future projects.

Our mission

To provide integrated architectural solutions that combine innovation, quality and functionality — customised to the needs of residential, commercial and institutional projects, and backed by a specialised team and advanced infrastructure that ensure maximum efficiency and reliability.

Core values

01 Innovation

Delivering new and innovative solutions that meet market developments and client needs.

02 Quality

Commitment to the highest standards of quality in every product and service.

03 Professionalism

Executing every project with precision through qualified and experienced teams.

04 Transparency

Building relationships based on honesty and clarity with clients and partners.

05 Sustainability

Developing environmentally responsible solutions that consider long-term impact.

By the numbers

15

Years operating in Qatar,
continuously since 2011

3,500+

Private shade contracts
completed in the last ten years

5

In-house production units under
one roof

40+

Government, corporate and
consultant clients

4

Markets served across the GCC
and North Africa

8

Product families, engineered and
manufactured in-house

2

Certified management systems,
ISO 9001 and ISO 45001

100%

Design, manufacture and
installation self-performed

Where we work

We build communities, not projects. Qatar is our home market and our manufacturing base; our systems and teams reach across the region from there.

Qatar

Head office, factory and installation teams. Building 465, Street 340, Zone 56, Salwa Road, Doha.

United Arab Emirates

Branch office in Business Bay, Dubai, serving UAE projects and regional enquiries.

Saudi Arabia

Project delivery and supply into the Kingdom through the Qatar manufacturing base.

Egypt

Regional presence supporting sourcing, fabrication support and project work.

How we are organised

A flat structure under the Chief Executive Officer, with four management functions and six site delivery teams.

Human Resources

Training and development officer; personnel officer.
Recruitment, mobilisation and workforce welfare.

Finance

Accountant, purchasing officer and storekeeper. Cost control, procurement and material stewardship.

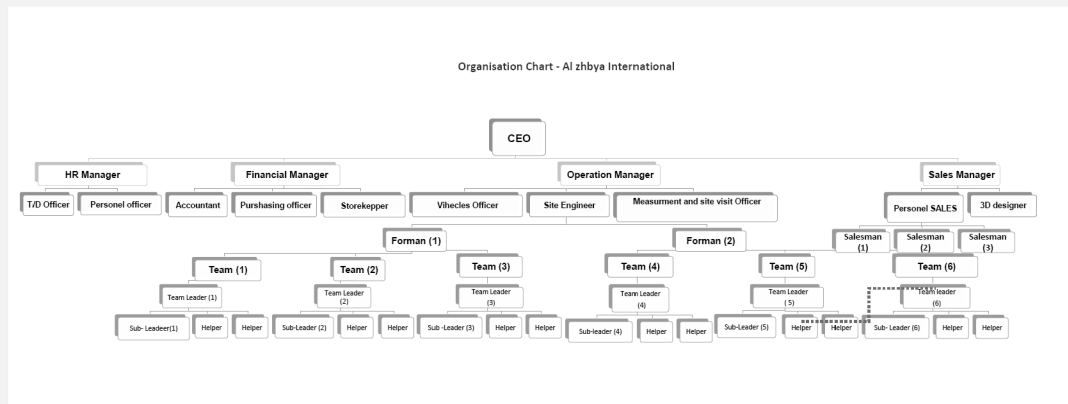

Operations

Site engineers, vehicles officer and measurement officer; two foremen directing six installation teams.

Sales & Design

Sales personnel and a 3D designer. Client development, surveys, visualisation and technical proposals.

Organisation chart

Four management functions under the Chief Executive Officer; two foremen direct six installation teams.

02

Capability

One contract, one accountable party — from the first survey to the last service visit.

Business divisions

Smart systems

Automatic and bioclimatic pergolas, retractable roofs, motorised glass and fabric systems, home-automation integration.

Architectural glazing

Sliding, folding, guillotine and frameless glass; curtain walling, windbreakers, pivot doors and glass enclosures.

Aluminium & uPVC

Doors, windows, façades, cladding and decking, fabricated on certified profile systems for Gulf climatic conditions.

Steel & structures

Car parking shades, K-span roofing, sheds, tensile structures, architectural metalwork and custom steel fabrication.

Shading & fabric

Cassette and classic awnings, retractable curtains, blinds, PVC and polycarbonate shading, in-house fabric welding.

Service & maintenance

Commissioning, testing, planned maintenance, spare parts and after-sales support for every system we install.

Why Al Zhbya

- Fifteen years of continuous trading in Qatar, from 2011 to today
- Design, engineering, production and installation under one roof
- Proven with the Armed Forces, Amiri Diwan and Qatar Museums
- Bespoke engineering — we build to the drawing, not to a catalogue
- Our own factory — nothing critical is sub-let to a third party
- Certified to ISO 9001:2015 and ISO 45001:2018
- Systems specified for Gulf heat, humidity, dust and wind load
- Structured after-sales service and spare-part continuity

Engineering capabilities

Design & visualisation

Shop drawings, 3D visualisation and setting-out from consultant tender drawings; value engineering at proposal stage.

Structural verification

Member sizing and connection design for wind load and dead load, with calculations issued for consultant approval.

Systems & controls

Motorisation, remote and app control, rain and wind sensors, home-automation interfaces and drainage integration.

Material engineering

Aluminium alloy and finish selection, powder coating specification, gasket and hardware matching to service conditions.

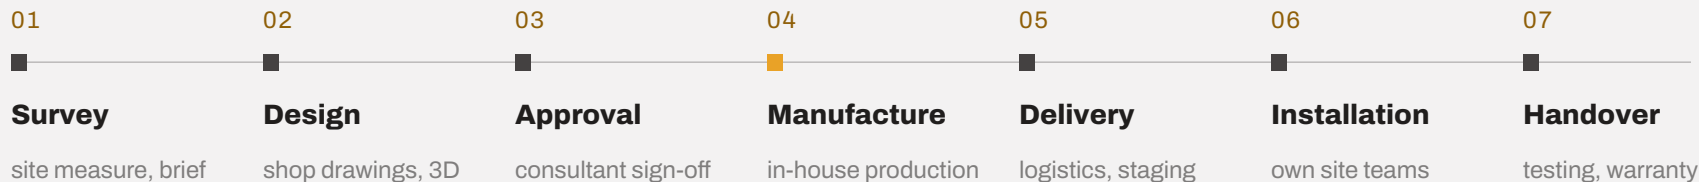

Glass & thermal

Insulated double-glazed unit design for thermal and acoustic performance; toughened, laminated and reflective options.

Site engineering

Survey, setting out, method statements, lifting plans, installation supervision, testing and handover documentation.

From enquiry to handover

Manufacture is the stage most contractors sub-let. We do not: it is performed in our own plant, which is what keeps programme, tolerance and finish under our control.

03

Products & Solutions

Eight system families. Every one engineered, fabricated and installed by Al Zhbya.

Built to a drawing, not to a catalogue

Every system on the following pages is engineered to the project, fabricated in our own plant and installed by our own teams. Sizes, finishes, glazing and controls are specified per contract.

Eight system families

01	Smart Roofs	Retractable, sloped, flat and fixed systems
02	Smart Enclosures	Sliding, accordion, frameless and curtain wall
03	Smart Curtains & Awnings	Retractable curtains, blinds, cassette awnings
04	Smart Doors	Entrance, fence gate and garage systems
05	Car Shades	A+, B+, PVC laser, K-span, polycarbonate, fabric
06	Doors & Windows	Aluminium and uPVC systems, double glazed
07	Privacy Screens	Aluminium, WPC, woven and fabric screens
08	Cladding & Decking	Façade cladding and weatherproof decking

Smart Roofs

Motorised and fixed roof systems that open a terrace to the sky and close it against sun, rain and dust — controlled by remote, app or rain sensor.

- Retractable: automatic PVC, louvred and automatic glass roofs
- Flat: Sky Roof single action and double action
- Fixed: glass, A+, B+ and classic fixed-roof pergolas
- Applications: villas, hotels, cafés, courtyards, roof terraces

Smart Enclosures

Glazed sides that turn a covered space into a conditioned room. Qatari-manufactured glass in clear, honey, sky blue and reflective; single or double glazed.

- Automatic glass windows and guillotine systems
- Sliding, accordion and frameless glass doors
- Curtain wall systems and windbreakers
- Applications: majlis extensions, restaurants, balconies, lobbies

Smart Curtains & Awnings

Light and privacy control in fabric. HDPE fabrics of Australian and Korean manufacture, 100% waterproof and sunscreen options, on rust-resistant structures.

- Horizontal and vertical retractable fabric curtains
- Vertical blinds and vertical roller blinds
- Cassette, classic and Wintent awnings
- Ten-year warranty on qualifying fabric systems

Smart Doors

The entrance is the first thing a client's client sees. Pivot and automated doors in aluminium, glass and composite, engineered for weight, wind and daily cycling.

- Smart entrance doors and oversized pivot doors
- Smart fence gates, sliding and swing
- Smart garage doors, sectional and roller
- Access control, intercom and automation integration

Car Shades

The division we were founded on, and still the largest by volume — over 3,500 private contracts in the last ten years, alongside Armed Forces and ministry frameworks.

- A+ and B+ car shades, 100% aluminium structure
- PVC laser, K-span and polycarbonate parking shades
- Fabric shades on heavy-duty I-beam poles
- Rust and corrosion resistant; ten-year warranty

Doors & Windows

Aluminium and uPVC door and window systems fabricated in-house on certified profiles, with insulated double-glazed units produced on our own IGU line.

- Casement, sliding, tilt-and-turn and fixed lights
- uPVC systems specified for Gulf climatic conditions
- Insulated glazing for thermal and acoustic performance
- Architectural façades, curtain walling and cladding interfaces

Drop an image

or [browse files](#)

Privacy Screens

Boundary and courtyard screening that gives privacy without closing a space in — in aluminium, engineered wood and woven synthetics.

- A+ aluminium screens and WPC wooden screens
- Woven synthetic wood and artificial grass screens
- Polyethylene fabric screens
- Applications: villa boundaries, pool decks, plant enclosures

Cladding & Decking

Surfaces for walls and floors that hold their finish outdoors — durable and resistant to weather, moisture and UV in Qatari service conditions.

- WPC and aluminium wall cladding
- Composite decking for pool surrounds and terraces
- Ceiling and soffit linings
- Applications: façades, pool decks, landscape structures

04

Manufacturing

Five production units, one plant, and the machinery list to prove it.

Our factory

Equipped with advanced machinery and skilled technicians. Aluminium, steel, uPVC, insulated glass and technical fabric are all processed on site — which is why programme and quality stay ours to answer for.

The facility

Two workshop halls with roller-shutter access and hardstanding for loading, a double-height fabrication atrium, and an office floor housing engineering, design and project management alongside the production line.

- Two professional workshops: metal works and fabrication
- Five dedicated production units
- Engineering and design offices on site
- Material storage, staging and dispatch yard

Inside the plant

Double-height fabrication hall with mezzanine and full-height glazing

Three-storey administration and engineering block on the factory site

Staff, meeting and client presentation area adjoining the production floor

Five production units

01 Aluminium Fabrication

High-precision aluminium profiles and components: cutting to industrial specification, CNC machining and drilling, forming and assembly.

02 Steel & Iron Fabrication

Structural and decorative steel: plasma and laser cutting, rolling and forming, precision welding and industrial quality control.

03 uPVC Systems

uPVC door and window systems for Gulf climatic conditions: profile cutting, corner welding, cleaning and hardware installation.

04 Double Glazing (IGU)

Insulated glass units from cutting and assembly to sealing and gas filling, for thermal and acoustic performance.

05 Fabric Welding & Sewing

Technical fabrics for shading and pergolas: cutting to dimension, thermal welding and precision industrial sewing.

05

Quality & Compliance

Two certified management systems, audited annually, and a complete statutory file.

Certified management systems

ISO 9001:2015 — Quality management

Certificate QACS-UAF-Q-QAT-AZ-04.25.1476. Issued 4 June 2025, valid three years to 3 June 2028, subject to annual surveillance. IAF codes 17 and 28.

Scope: parking shades, pergola, steel structure, construction and general contracting.

ISO 45001:2018 — Health & safety

Certificate QACS-UAF-OH-QAT-AZ-04.25.911. Issued 4 June 2025, valid to 3 June 2028. Accredited by the United Accreditation Foundation, USA.

Same certified scope of works.

Quality assurance in practice

- Material inspection and mill certification on receipt
- Weld inspection and finish checks before dispatch
- Factory functional testing of motorised systems before delivery
- Handover file: as-builts, warranties, O&M and spares schedule
- Dimensional checks against approved shop drawings at each stage
- Powder coating thickness and adhesion verification
- Site snagging, joint testing and water-tightness checks
- Non-conformance recording and corrective action under ISO 9001

Health, safety and environment

- ISO 45001:2018 certified occupational health and safety system
- Toolbox talks and induction for every site team
- PPE issue, inspection and enforcement on all sites
- Workshop machine guarding and electrical safety regime
- Project-specific risk assessments and method statements
- Lifting plans and certified equipment for structural installations
- Incident reporting, investigation and corrective action
- Waste segregation and responsible material disposal
